

Mike Grzanowski
Vice President, Operations

Mike Grzanowski joined Blach Construction in 2009. After more than a decade of experience on several of Blach's largest and most complex projects, he was promoted to Vice President, Preconstruction. In overseeing Blach's in-house estimating, MEP and Virtual Design & Construction teams, while being intricately involved in Blach project pursuits, he demonstrated a keen ability to strategically connect business development, preconstruction and operations groups. His industry savvy, coupled with his high degree of technical acumen and dexterity at leading teams, developing employees

and understanding market requirements led to increased responsibility as Vice President, Operations. In this expanded role, Mike will continue to manage preconstruction efforts and will assume oversight of overall project management and operations, which includes strategic planning and staffing for all projects.

Mike is a trusted advisor to clients, colleagues and trade partners. As his resume – and many Blach clients – will attest, Mike is a strategic thinker who is highly skilled at identifying solutions to complex construction challenges throughout every phase of a project – from design to preconstruction and into substantial completion. His detailed and thorough approach is instrumental in developing and transparently delivering preliminary construction budgets that ultimately result in detailed estimates, a comprehensive GMP and a final project that is aligned with client requirements. Client-facing, Mike is a service-minded collaborator who works tirelessly to ensure Blach projects consistently meet client programming, budget and schedule expectations.

An active member of the Design-Build Institute of America, Mike also belongs to the U.S. Green Building Council. He holds a B.S. in Real Estate and Construction Management from the University of Denver.
